

RFP Title: Terminal Evaluation (TE) for the “Transforming the Fashion Sector to Drive Positive Outcomes for Biodiversity, Climate, and Oceans” project.

RFP No: GEF-TE-Fashionpact-014

Clarifications Distributed on: May 12, 2023

Question	Response
<p>1. Is it necessary to analyse all textile sector or only fashion sector: required countries textile producers or exporters or only fashion countries . In first data analysis review CHINA and GERMANY dominate FASHION EXPORT in the world</p>	<p>It is expected to analyze the fashion sector and specifically in relation to raw materials production and impacts in nature as per the project focus. The project deliverables will be shared with the consultants as part of the desk review process.</p>
<p>2. Which are the countries studied by the project started in 2021?</p>	<p>This is a global project that had pilot activities in Cambodia, Kenya and Brazil (C3).</p>
<p>3. Will any field Travel be required for this evaluation? Are travel costs separate from Budget?</p>	<p>As this is a global project, it is not expected the consultants visit the pilot countries but to talk to the delivery partners during the interview process/information gathering part.</p>
<p>4. Is it necessary to have a team or can we purpose an individual expert for this task?</p>	<p>It is more advantageous for bidders to submit a proposal with a team, but the RFP does not disqualify individual experts for the terminal evaluation.</p>
